Professional Summary

Results-driven Full-Stack Developer specializing in the MERN Stack (MongoDB, Express.js, React.js, Node.js). Experienced in designing high-performance web applications, architecting scalable database schemas, and constructing secure, token-based RESTful APIs. Solid foundation in Data Structures, Algorithms, and Object-Oriented Programming (OOP) in Java. Adept in modern development tools, state management practices, and agile workflows.

Education

APJ Abdul Kalam Technical University

Bachelor of Technology in Information Technology (CGPA: 8.1/10)

Lucknow, Uttar Pradesh

Sep. 2022 – June 2026

Relevant Coursework

Data Structures & Algorithms (Java) | Object-Oriented Programming (OOP) | Backend Development (Node.js, Express.js, MongoDB) | Full-Stack Web Development (HTML5, CSS3, JavaScript, React.js)

Experience

MERN Stack Trainee Sep. 2025 – Apr. 2026

GUVI (IIT-M Incubated) Chennai, India

- Successfully completed a intensive 7-month training architecture program focused on scalable MERN Stack implementation.
- Engineered full-stack applications leveraging modern software architecture, robust RESTful APIs, and responsive interface workflows.
- Utilized Git/GitHub actively for clean source code control, executing standard branching, pull-request practices, and collaborative code reviews.

Projects

Trendora E-Commerce Platform | *React.js, Node.js, Express.js, MongoDB*

[GitHub](#) | [Preview](#)

- Developed a scalable, full-featured e-commerce system featuring secure token-based user authentication (JWT) and role-based access control.
- Designed and optimized CRUD-centric RESTful APIs to control product listings, search filters, database sorting, and shopping cart modules.
- Created an intuitive admin control panel to streamline real-time inventory management, category updates, and order monitoring.

QuickBite Food Delivery App | *React.js, Firebase Backend, Netlify Hosting*

[GitHub](#) | [Preview](#)

- Built a real-time food delivery portal featuring distinct client-ordering and administrative monitoring interfaces.
- Implemented dynamic card state management, user authentication flows, and real-time database synchronizations using Firebase.
- Deployed the highly responsive web interface utilizing optimized asset-bundling, resulting in swift cross-device render times.

News Aggregator Application | *MERN Stack, Real-Time News API, Render*

[GitHub](#) | [Preview](#)

- Engineered a real-time news application integrating live external News APIs to deliver categorized content updates globally.
- Structured user-friendly client state flows, incorporating customizable searching, categorizing, and keyword filters.

Technical Skills

Programming Languages: Java, JavaScript (ES6+), HTML5, CSS3

Frontend Web Development: React.js, Tailwind CSS, Lucide React, Framer Motion, Redux

Backend & Core: Node.js, Express.js, RESTful APIs, WebSockets (Socket.io), System Design, MVC Architecture **Databases:** MongoDB (Mongoose, Schema Validation), SQL

Tools & Cloud Engines: Git, GitHub, Postman, Render, Netlify, VS Code

Certifications

IIT-M Pravartak Certified Full Stack Development Course with AI Tools | GUVI (HCL) 2026

- Successfully completed a comprehensive 7-month full-stack certification focusing on modern system engineering, deployment pipelines, and AI developer productivity models.
